

ICEYACHTS
PASSION NEEDS ICE

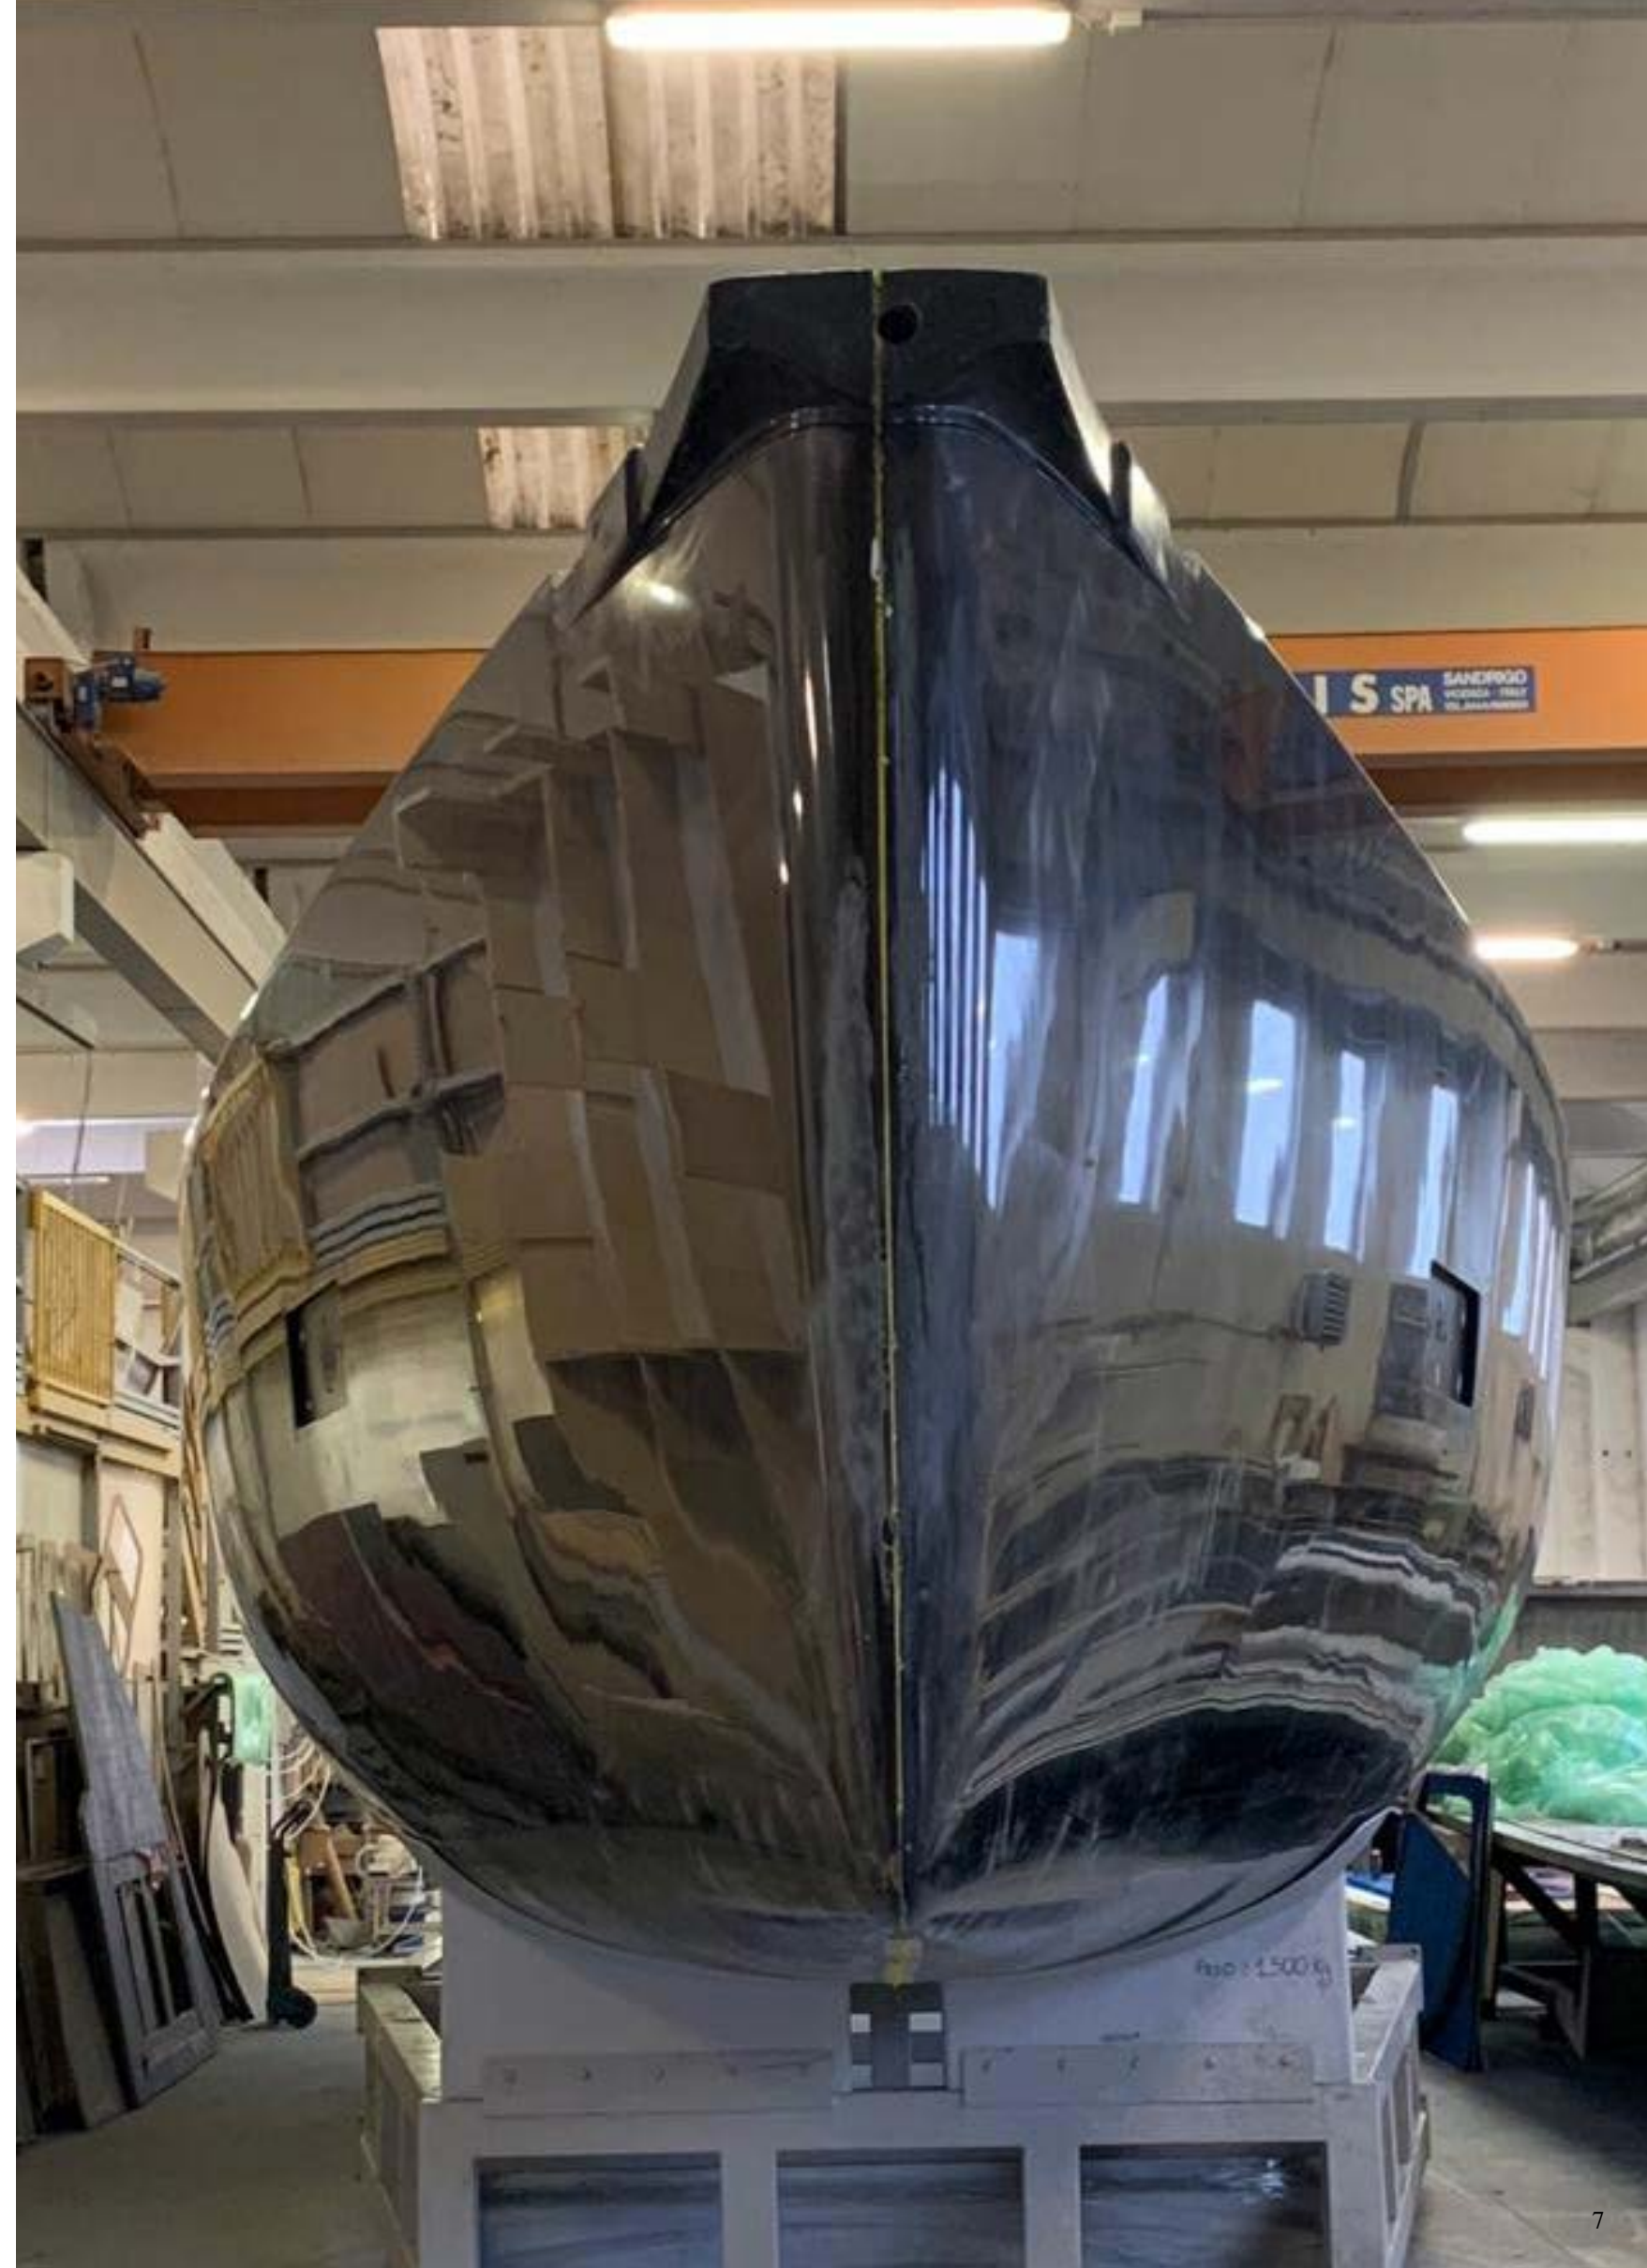

OUR SAILOSOPHY

AUTHENTICITY | EXCLUSIVE | PERFORMANCE

MARCO MALGARA - CEO OF ICE YACHTS

“If you like hideous boats, standard cars and packaged holidays please go somewhere else.
We only build amazing yachts, designed for those who don't fear beauty
and don't need to show off their fortune.
We create boats for owners that want to experience pleasure while navigating at maximum
of their capabilities, in a thousand miles race against their selves.
IceYachts designs and builds yachts where technology is aimed to improve performance
and safety.
Our boats maintain their value in the years; above and beyond the latest trends,
initiating the success of many hideous boats fated to shortly end their service
on a forgotten field.
These few pages won't give you a taste of that feeling of wellness experienced
at the helm of an ICE.
Although experienced sailors surely will sense the care that leads
to the launch of our masterpieces”.

PROJECT CUSTOM

OUR SAILOSOPHY

An ICE is born to spread all the emotions of sailing without handing over concerns.

The yacht is extremely reliable in all sea conditions.

It is fast in low to high breeze. Comfort and safety are the key factors.

ICE's waterlines are designed to sail for decades and thousands of miles.

They are inspired to a concept of modern-classic grace and not to fashion trends that would result fancy today and rude tomorrow.

The ICE charm doesn't want to show off but clearly stands boundless and leaves you speechless.

These boats are easy to handle, suited for long range cruises.

Our yachts have been tested in transatlantic races and inshore races from the shipyard staff, which spreads its competence and passion on these small handcrafted high-tech artworks.

Ice rewards emotions and relieves concerns.

This is what we call Sailosophy.

ITS CHARM IS NOT OSTENTATIOUS, BUT DEEP AND SILENT!

Each Ice is a unique piece, a masterpiece of high tech craftsmanship completely customized. We are concentrated on hearing the needs of our customer, in fact, we define and develop a project for customizing spaces and materials. Those details affect performance, navigation and comfort. For this reason the team follows step by step all the process: discussions, delivery processing and post-sail support.

Our first goal: the satisfaction of our ship owners.

TAILORED FIT

Our mantra in building a new boat is and will always remain to understand and realize the needs of the customer, we are custom made. Nothing is standard except for the high level of quality and safety.

STYLE DETAILS

We do not talk about the colors of the pillows or the brand of the kitchen, but about a project that is developed around the sea in the way to going to the new owner, those choices affect the displacement, draft, engine and every on board component.

To guarantee the performances is added the best technologies used in the construction and the high quality craftsmanship, made by specialist that use their long experience of dedicated activities to the realization of boats that have written the history of sailing.

IT IS NOT EASY TO SEE THE QUALITY OF AN ICE

UMBERTO FELCI - FELCI YACHTS DESIGNER

ICE Yachts is to us a highly important client. Although the brand is relatively new, we do collaborate with their artisans since long time. Together we have built many yachts, of which I remember ten FY61 and six FY71.

Two new projects have been launched thanks to the past two years capital investments: the ICE52 and the ICE62, both are beautiful, fast and incredibly reliable.

First with Yacht2000 and then with ICE Yachts we have introduced many innovations that are now common practice.

We have moved the galley forward and shifted the sole up, to define the living space and improve the entrance.

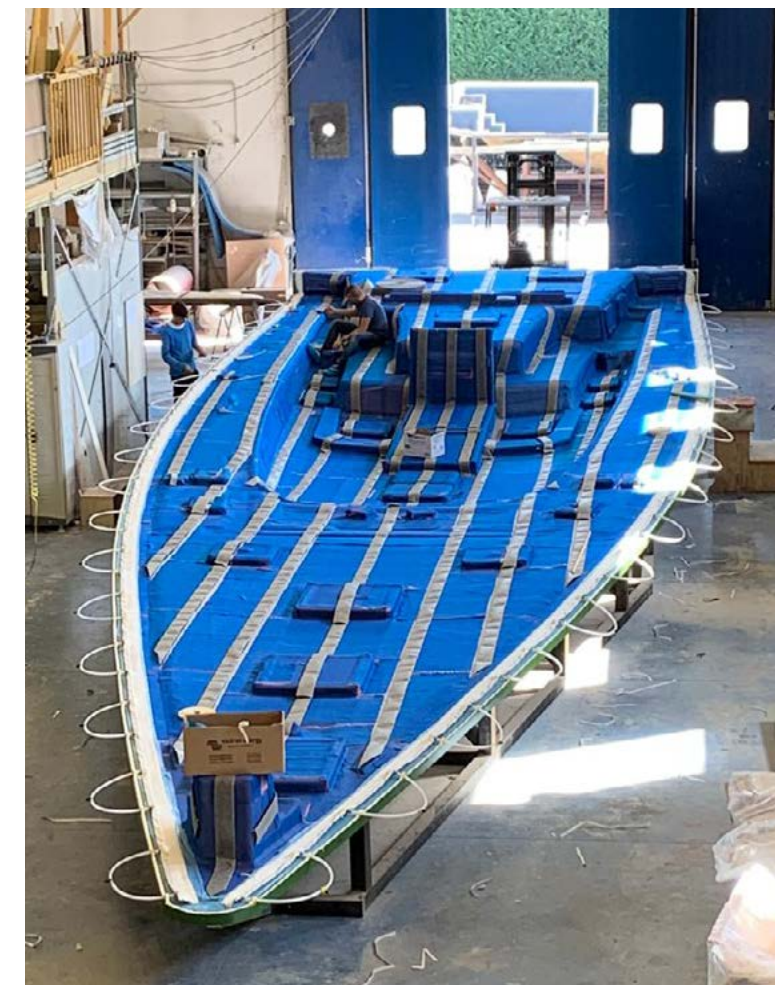

To understand the peculiarity of an ICE you need to visit the shipyard while the hull is under construction, talk to the technicians and ask them why it takes so long and so much care for details and passion, to get it done.

This yachts have a structure and an eternal soul, as well as their lines that will be elegant and fast for many years yet to come."

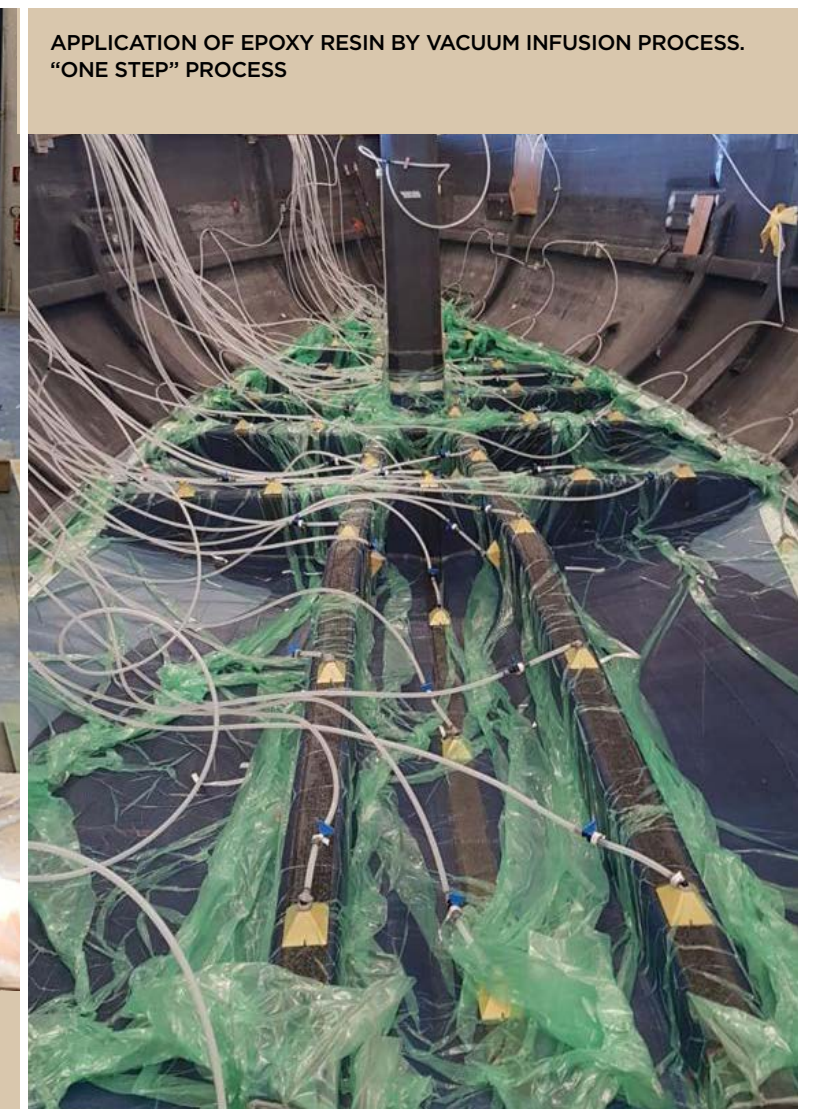

Umberto Felci
Felci Yacht Design

HULL PREPARATION

IN ICE THE HALLMARK OF ITALIAN-STYLE MANUFACTURING:
SCRUPULOUS AND OBSESSIVE ABOUT DETAILS

STUCTURE: STIFFR THAN THE STANDARD

The quality of an ICE stands out when the wind is blowing at 20 knots and the sea condition is rough.

The structure, that undergoes critical loads, responds with stiffness and unperceived flexures.

The structure of our boats is an outcome of artisanal know-how, high-tech technologies and on-field experience.

All of our hulls are made of carbon based FRC, vacuum infused and stiffened up with unidirectional carbon fibres.

This is a long and safe procedure that guaranties the longevity of the yacht, its performances and its value.

EACH ICE IS BUILT WITH VERY HIGH TECHNOLOGY STARTING FROM THE STRUCTURES

LORENZO GIOVANNOZZI
DESIGNER AND STRUCTURAL ENGINEER
PARTNER FELCI YACHT DESIGN

“For a designer, the opportunity to work with a quality yard means being able to aim higher knowing that what you are imagining will be carried out to perfection, with all the necessary care, thanks to the skill and passion of those who practically will give life to your ideas.

This is how the structures and appendices of an ICE are born: technology and efficiency for maximum safety and performance”.

Lorenzo Giovannozzi
Felci Yacht Design

DESIGNED TO ENJOY LIFE ON THE DECK

An Ice Yacht allows you to enjoy every moment on the deck, with a clean layout that stands out as an advanced concept.

ICEs are designed to be fast and efficient also with full load of guest and supplies.

Sea worthy boats, equipped with first class components, oversize winches and deck gear for halyards and sheets.

A deck layout developed after years of sailing and boat building experience. Cleverly laid out to maximise a user-friendly approach, fitted with the best components on the market. Over the years we have selected the top companies and we have built long lasting relationships.

ICE52 GOOSE

MORE PERFORMANCE IS THE MAIN FOCUS

ICE Yachts and the Felci Yacht Design team, join forces once again, to produce one of the most exciting and innovative projects in their collaboration.

By **RS** ICE YACHTS means "Racing & Sailing"
A yacht created to stand out in major regattas and then transform into a comfortable cruiser.
Thanks to its dual configuration the ICE 52 RS combines racing performance with the comfort needed for long distance cruising.

IceYACHTS
52RS GOOSE

FULLCARBON construction,
INNOVATIVE and ESSENTIAL
design, HIGH TECH interior.

The interior layout is designed for
cruising conformation without
compromise the racing soul. Interior
spaces are thought to be bright and
wide, achieving significant weight
savings compared to a traditional
construction, without sacrificing the
quality of joinery workmanship, both
in the refinement of finishes and in
the excellence of details.

MARCO MALGARA - CEO ICE YACHTS

"We have in the pipeline a boat
that is not only beautiful
and very well finished, light, fast, competitive
and at the same time comfortable, a real bomb,
the top on the market."

SUPERIOR COMFORT | TOP PERFORMANCE

PELLE NORBERG - SWEDISH YACHTSMAN AND BUSINESSMAN

“IceYachts are made for those who love fast sailing, exceptional comfort and fine quality. To explain the superior level of quality, I keep saying that an IceYacht must be experienced. IceYachts are always a step higher than the standards, that’s why their value will always be high”.

Right page: IceYachts 52 Skidbladner II

ICE 53ST

ELEGANCE AND SPEED

ICE Yachts and the Felci Yacht Design team, join forces once again, to produce one of the most exciting and innovative projects in their collaboration.

By **ST** ICE YACHTS means to SPORT TOURISM that is, an object to look great in major sailing events and then to cruise with a good degree of comfort thanks to the dual configuration.

FULLCARBON construction,
INNOVATIVE and **ESSENTIAL**
design, **HIGH TECH** interior.

The interior layout is designed to be extremely versatile to easily switch from the cruising conformation to the sporty and essential racing conformation.

The interior finish will be a mix of white painted and fairing surfaces and light finish composite panels, thus achieving significant weight savings compared to a traditional construction, without sacrificing the quality of joinery workmanship, both in the refinement of finishes and in the excellence of details.

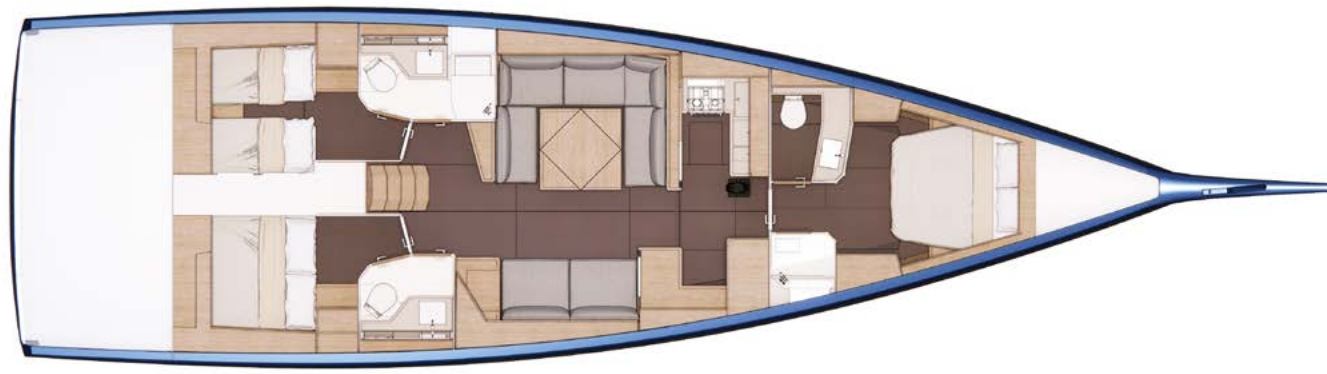

ICE 56

“A TRUE MAXI YACHT
IN JUST 56 FEET”

“The latest creation from IceYachts,
combining sportiness, luxury, and innovation

ICE 56

THE FUTURE OF YACHTING

Design above and Below Deck inspired by the new 80-foot Maxi ICE, the ICE 56 features a sleek sporty deckhouse with larger glass surfaces for stunning natural light and panoramic views.

The spacious cockpit, with its 5 meter beam, includes an adjustable table that transforms into a large sunbed perfect for relaxing at sea.

Below deck, the refined layout ensures privacy and comfort. The forward owner's cabin stands out for its generous space, brightness, and private bathroom with a separate shower every detail crafted for maximum well being on board.

“NOTHING LESS THAN THE BEST “
Is the shipyard’s slogan for this new line

ALESSANDRO PAGANINI
SENIOR NAVAL ARCHITECT

“Working on the structural design of a fast cruising sailing yacht is not an easy task especially when the builder is ICE Yachts, a prominent yard with several successful models and with an high expectation on this new ICE 66RS. Being selected as a part of the design team with Farr Design and Micheletti & Partner pushed us in doing our best in finding the best structural solutions for offer a light, stiff and stable boat. Looking back at the engineering phase I see an exiting exchange of knowledge inside the team and a fresh, new approach with the contruction at ICE Yachts. I am preatty sure this boat will be the starting point of new luxurious, safe and performance oriented era of the italian boat building and design in the world.”

MARCO MALGARA
CEO ICE YACHTS

“We wanted to collaborate with the best designers on the market to guarantee a light, fast, competitive and at the same time comfortable boat. The best on the market to bring the shipyard’s Made in Italy to an international level. This line does not intend to replace existing production, but will support it, addressing a public that appreciates the solidity and performance of ICE Yachts but is looking for a more futuristic design”

BETTER THAN HOME EVEN AT 12 KNOT

To understand ICE Yachts Sailosophy
you should seat below the deck while
the hull cuts the waves
at 12 knots speed.

There is no squeak noise
from the structure.

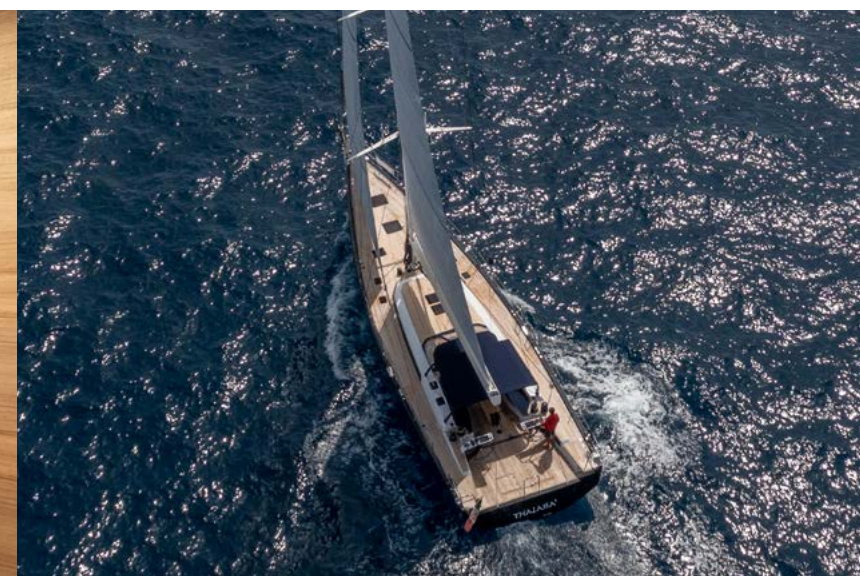

Thanks to the composite rigidity,
everything is firmly solid.

The pleasure of sailing is achieved
in total silence.

The dinette is a step higher then rival
yachts, hence your eyes will be level
with hull portholes, not to miss a
single image of the journey.

Galley backward to the dinette not to
interfere with below deck activities as
sailing or mooring.

Teak is the key element. Light tones
and contemporary
look, still with a classic flavor
of tradition.

IceYACHTS
70RS BANDIDO

ICE 70 RS

ICE 70RS by Felci Yacht Design is a high performance yacht, designed to be a complete cruiser, very robust, seaworthy and perfect for long offshore navigations.

Despite being equipped with all comforts and is particularly easy to handle, the vessel will be able to compete at the highest levels in offshore races, both fully crewed or with a reduced crew.

To achieve this goal the build quality and control of the total weight have a decisive importance.

ICE 70RS is made of lightweight materials but without any structural deprivation that compromise its security.

This has been possible thanks to a focused design and construction of a commitment that has kept this goal always in mind. The systems are made with the best materials and the best technology, in

BETTER THAN HOME EVEN AT 12 KNOT

Interior design is made by Felci Yacht Design together with ICE Yachts Technical Office and the Owner of the vessel (this includes the final layout of interior arrangement, including position of bulkheads, hull windows, etc). The interiors are strong and professionally built, following all the top state of the art standards.

QUALITY | EMOTIONS | SKILLS

BOBO - SKIPPER

“Sailing on an ICE you always experience great emotions. The lightness of the boat and the ease of maneuver make everything very pleasant so much that you have no kind of concern and you can enjoy the trip at the top, whether it is a cruise or not. Yacht designed for those ship owner that are looking for a boat safe and fast suitable for solitary sailing, protected and with so much comfort.

The yard has a remarkable group of ship owners, congratulations!
A team of experienced professionals specialist and always available to the customer”.

Right page: above Bobo at the helm

IceYACHTS
60 JOY

PERFORMANCE | HABITABILITY | SAFETY

ENRICO MALINGRI DI BAGNOLO - SAILOR AND BOAT EXPERT

"IceYachts are built with extensive knowledge and know-how, featuring specifications that make them unique on the market.

Hull and deck are made with infused epoxy resin and extensive use of carbon fabrics for maximum strength and lightness.

Huge attention is paid to weights. From composite bulkheads to PVC foam cored floorboards and composite ceilings. The result is a boat that performs as a racer, it is solid as an ocean offshore and has great spaces below deck.

The ideal boat for a nice cruise in Greece with no distance limits, and the following month a long offshore race in the Med or Atlantic.

An IceYacht has all the features of my dreamboat which I would define ***Sail with no limits.***

This concept represents the boatyard's family philosophy.

I am proud to give my contribution every day to build this concept of yachts".

DESIGN | STYLE | MADE IN ITALY

LUCA ORIANI - DIRECTOR OF IL GIORNALE DELLA VELA

Where the success of Ice Yachts come from?

It took me ten years ago in the construction site of Salvirola with Marco Malgara to understand what the recipe was. As in an ultra-technological atelier, boats are made in that shed, so far from the sea, as must be made today in pure style made in Italy. High technology and crafts blend to offer a high-quality product. Look at the waterlines of Ice Yachts' top seller, ICE 52. A simple beauty that express elegance and speed without exceeding in muddy extremism. Marco knows that in my opinion, at the time ICE 52 was the perfect boast for those who understand of it. Years have passed, but that Ice Yachts spirit has remained intact. At the Cannes Boat Show in 2021, I confirm that the new ICE 70 was the most beautiful boat. I am not saying that to make a favor to Marco or to his wife Ingrid. It is true, it was the queen of Cannes. Long life to Ice Yachts and its unmistakable DNA.

Right page: Ice Yachts 52 Jannaker
under Luca Oriani

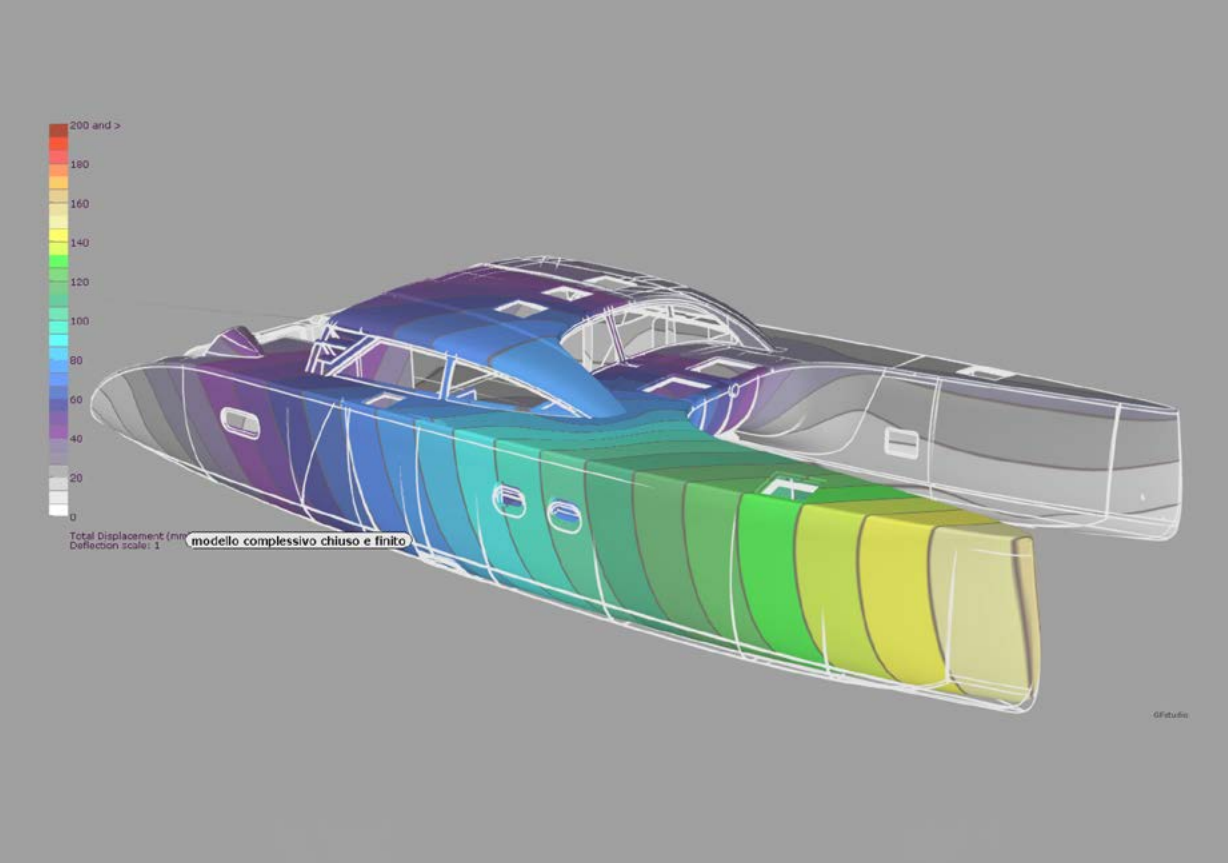

PASSION NEEDS ICE

FELICE EGIDI - OWNER OF SOTTO SOPRA E BASTA

"I choose Ice Yachts because I like to fly on the waves and be one with the sea and the wind in absolute safety"

FUTURE IS AROUND THE CORNER

ENRICO CONTREAS - YACHT DESIGNER

“For sailors pleasure means to go fast and to be comfortable.

To maximise it we have designed the first Italian luxury sailing cat.

A 61 footer that can be built either out of hybrid laminates or full carbon.

An extremely reliable boat, where technology is used to create fast, dry and smooth sailing. Design is focused on the ease of sailing and manoeuvring, both inshore and in marinas. The draft of just less than a meter will allow you to take the bliss straight to unforgettable places. Motoring with only 160 horsepower you will be able to cruise at 13 knots of boat speed, while with sails you can get up to 25knots, on the displacement version. If you like speed or you are always on the run, the full carbon version with variable displacement is your call. The curved daggerboard will reduce the hull “effective” weight, enhancing the performance.

For those caring about nature, those who have a “green” vision or wanting to minimise engine noise, the hybrid version is the ideal fit”.
